<b>Office Action Summary</b>	<b>Application No.</b> 10/559,151	<b>Applicant(s)</b> METCALFE ET AL.	
	<b>Examiner</b> JONATHAN R. STROUD	<b>Art Unit</b> 3774	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. Claims 37-44 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 08/07/2008. Claims 1 and 18-36 remain pending.

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
2. Claims 1, 18-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vanasse 6,977,000 and further in view of Graves 5,288,161.
3. Vanasse teaches a modular hip prosthesis 10 with two primary components 24, 22, being releasably connected via arms 68, 66, 72, that are forked and bifurcate from main body 56 and that attach to first portion 22. Vanasse teaches the parts and attachments can be comprised of grooves, forks, bifurcations, integrally formed, with planar guides.
4. Vanasse fails to teach a resilient arm that can selectively move to engage the device and connect, and further disconnect later.

Art Unit: 3774

5. Graves teaches a simple locking mechanism seen in figs. 2 and 6, which comprises grooves and divots (similar to Vanasse) and at least one pivotally connected level 40, adjustable locking pin 44, and similar, more complex iterations of the locking mechanism described in applicant's claims, for the purpose of creating a quick release lock mechanism that allows for the quick and easy attachment of an extension, col. 1 ll. 45-50. Graves can lock onto handles extensions of tools as well, as is taught in col. 1 ll. 45-50.

6. It would have been obvious to one of ordinary skill in the art at the time of invention to modify Vanasse in view of Graves, in order to provide a reversibly locking modular prosthesis such as the one taught by Vanasse, which could be easily locked and unlocked, and further to create a quick release lock mechanism that allows for the quick and easy attachment of an extension, col. 1 ll. 45-50.
